Portfolio: <https://nrzmo.github.io/>

PERSONAL STATEMENT

Computer Science with Artificial Intelligence student at Sheffield Hallam University with practical experience in machine learning, full-stack web development, geospatial analytics, and real-time software systems. Experienced in developing data-driven applications through both individual and Agile team-based projects. Strong problem-solving, teamwork, and communication skills demonstrated through collaborative software engineering projects and professional work experience. Currently seeking a software engineering placement opportunity to further develop my technical expertise within a real-world development environment.

TECHNICAL SKILLS

Programming Languages	Machine Learning & Data
Python, TypeScript, JavaScript, PHP, C#, C++ SQL, HTML5, CSS3	Scikit-learn, Pandas, NumPy, Classification & Regression Models, K-Means Clustering, Data Cleaning & Preprocessing, Feature Importance Analysis, Data Visualisation
Web & Software Development	Tools & Methodologies
React, REST APIs, Socket.io, Leaflet Mapping, Responsive UI Design, Authentication Systems, Full-Stack Development	Git, GitHub, Jira, Agile Development, Scrum, Testing & Debugging, MySQL, SQLite, Visual Studio Code, Visual Studio

UNIVERSITY PROJECTS (All projects can be viewed in my portfolio!)

Sheffield Urban Road Safety: Geospatial Clustering & Predictive Pipeline:

- Developed an end-to-end machine learning and geospatial analytics pipeline using UK Department for Transport collision data to identify accident hotspots and predict crash severity.
- Engineered a memory-efficient chunked data ingestion pipeline processing over 67,000 records while maintaining system stability.
- Applied K-Means clustering and Random Forest classification/regression models using Scikit-learn for hotspot optimisation and predictive analysis.
- Produced data visualisations and explainable AI insights to identify key collision risk factors.

VELOCITI National Rail Mapping System:

- Collaborated within an Agile Scrum team to develop a real-time national rail mapping application using React and TypeScript.
- Developed advanced train route visualisation features using Leaflet polylines and live train schedule data.
- Implemented responsive mobile-first UI layouts and interactive map-based interfaces using Chakra UI.
- Integrated real-time train tracking systems using Socket.io and external railway APIs.

- Participated in sprint planning, GitHub collaboration, user story refinement, and Jira project management workflows.

EDUCATION

Sheffield Hallam University - BSc Computer Science with Artificial Intelligence

September 2024 – Present | Relevant Modules:

- Advanced Programming
- Professional Software Projects
- Artificial Intelligence & Machine Learning
- Algorithms & Data Structures
- Databases & The Web

Brinsworth Academy Sixth Form 2022 – 2024 | A-Levels:

- Information Technology (A*)
- Creative Digital Media (A)
- Business Studies (B)

WORK EXPERIENCE

Traffic Management Operative — The Traffic Management Company | March 2023 – Present

- Worked effectively within high-pressure operational environments while maintaining safety and service standards.
- Developed communication, teamwork, and decision-making skills through collaborative operational work.
- Assisted with mentoring newer staff members and supporting day-to-day operations.

In-Store Team Member — Taco Bell | November 2023 – September 2024

- Worked efficiently within fast-paced customer service environments.
- Developed strong teamwork, adaptability, and time management skills.

Cleaner — UNICUS Sheffield Ltd (Seasonal) | July 2023 – August 2023

- Maintained high cleanliness and operational standards across working environments.
- Demonstrated strong attention to detail, reliability, and time management throughout seasonal work.

In-Store Team Member — Domino's Pizza, Rotherham | September 2022 – October 2023

- Worked efficiently within a fast-paced customer service environment while balancing multiple responsibilities during busy operational periods.
- Developed strong communication, teamwork, and adaptability skills through collaborative shift work.

INTERESTS & HOBBIES

- Enjoy playing football and strengthening myself at the gym.
- Enjoy self-learning coding languages and exploring new frameworks and tools.
