PERSONAL STATEMENT

Computer Science with Artificial Intelligence student graduating in April 2027, with practical experience developing machine learning applications, full-stack software, geospatial systems, and algorithmic solutions. Experienced with Python, JavaScript, C#, C++, TypeScript and React across individual and agile team-based projects, with hands-on experience in machine learning, data structures, graph algorithms, APIs and real-time systems. Strong problem-solving, collaboration and technical communication skills, seeking graduate opportunities across software engineering, AI, web development and technology.

EDUCATION

Sheffield Hallam University - BSc Computer Science with Artificial Intelligence | *September 2024 – April 2027*. Expected 2:1 - Relevant Modules: Advanced Programming | Professional Software Projects | Artificial Intelligence & Machine Learning | Algorithms & Data Structures | Databases & The Web

Brinsworth Academy Sixth Form | 2022 - 2024

A-Levels: *Information Technology (A*)*, *Creative Digital Media (A)*, *Business Studies (B)*.

TECHNICAL SKILLS

PROGRAMMING: Python, C#, C++, JavaScript, TypeScript, PHP, SQL, HTML5, CSS3

AI & DATA: Scikit-learn, Pandas, NumPy, Classification, Regression, K-Means Clustering, Data Preprocessing, Feature Analysis, Data Visualisation

SOFTWARE DEVELOPMENT: React, REST APIs, Socket.io, Leaflet, Full-Stack Development, Responsive UI, Authentication

ALGORITHMS & DATA STRUCTURES: Graphs, BFS, Dijkstra's Algorithm, Linked Lists, Stacks, Algorithm Complexity Analysis

TOOLS & PRACTICES: Git, GitHub, Jira, Agile, Scrum, Testing & Debugging, MySQL, SQLite, Visual Studio, VS Code

PROJECTS

VELOCITI - National Rail Mapping System

- Collaborated within an Agile Scrum team to develop a real-time national rail mapping application using React and TypeScript, integrating external railway APIs and Socket.io.
- Developed interactive train route visualisation using Leaflet, live schedule data and map-based interfaces, alongside responsive mobile-first UI using Chakra UI.
- Contributed to GitHub-based collaboration, Jira project management, sprint planning and user-story refinement, gaining experience working within a professional-style software development workflow.

Sheffield Urban Road Safety - Machine Learning & Geospatial Analytics (Python)

- Developed an end-to-end machine learning and geospatial analytics pipeline using UK Department for Transport collision data to identify accident hotspots and predict crash severity.
- Engineered a memory-efficient chunked data ingestion process capable of processing 67,000+ records, improving stability when handling large datasets.
- Applied K-Means clustering and Random Forest classification/regression using Scikit-learn, with data visualisation and feature analysis to identify key collision risk factors.

Influence Network Analysis - C#

- Developed a graph-based influence analysis system in C#, implementing BFS and Dijkstra's algorithm to calculate influence scores across weighted and unweighted networks.
 - Analysed algorithmic complexity and scalability, applying the system to a real-world road network dataset and evaluating the performance implications of repeated shortest-path calculations.
-

Nikola Razmoski

WORK EXPERIENCE

Traffic Management Operative - The Traffic Management Company | *March 2023 – Present*

- Worked effectively in high-pressure operational environments requiring strong communication, teamwork, reliability and adherence to safety procedures.
- Supported day-to-day operations and assisted newer team members, developing leadership, decision-making and responsibility.

Delivery Driver - Warrior Logistics | *June 2026 – Sep 2026*

- Worked independently to complete time-sensitive delivery routes, managing schedules, customer interactions and operational issues while maintaining service standards and supporting colleagues through rescues.

In-Store Team Member - Taco Bell Broughton Lane | *Nov 2023 – Sep 2024*

- Worked efficiently within a fast-paced customer service environment while balancing multiple responsibilities during busy operational periods.

In-Store Team Member - Domino's Pizza Rotherham Central | *Sep 2022 – Oct 2023*

- Developed strong communication, teamwork, and adaptability skills through collaborative shift work.

Cleaner - UNICUS Sheffield Ltd | *Jul 2023 – Aug 2023*

- Demonstrated strong attention to detail, reliability, and time management throughout seasonal work.
-
